In my journey of learning Fusion 360, I took on this project as a test of my skills in design for the ease of printing, assembly and enjoyment of a quick shelf or desk top decoration or toy. The files are indexed in accordance to groupings of same color printing as well as quantity to print greater than one. It includes a stand as well as a possibility to mount it on a post or tube.

The original movie clips and stills were used from the 1983 TRON film.
